Dr. Pierre Schaeffer
Institut Pasteur
28 Rue du Dr. Roux
Paris 14, France

Dear Pierre:

Thank you for your letter. I know that Harlyn will be very happy to hear from you.

As you know I will be departing for Stanford University before very much longer and what with the events of the last week or so it does not look as though I will have any opportunity of renewing our examination of hemophilus before our departure. Your lyophil tubes have arrived in very good order and I will simply take them out with me to California. Thank you very much for this courtesy. I was glad to have a chance to talk with you again, brief as the opportunity was at Stockholm.

Yours sincerely,

Joshua Lederberg
Professor of Medical Genetics

JL/jp
